Contributed to knowledge sharing and mentoring juniors in team; participated in internal code reviews and best-practice sessions.

SOCIAL LINKS

EDUCATION

2014	B.C.A. - Computer Applications (General) Panjab University
2012	12th West Bengal, Bengali / Bangla Marks - 75%
2010	10th West Bengal, Bengali / Bangla Marks - 57%

PROJECTS

SMS Project

24 Months

- Developed a high-throughput SMS system using custom PHP, MySQL, SMPP, Redis and Gearman.
- Implemented Sender ID management, dynamic templates, bulk upload from Excel, and detailed send/failure reporting.
- **Enabled OTP, transactional and promotional message flows** with session and CSRF security controls.
- Use **Gearman** for backend process to queue messages
- Create **PHP Demon** for **SMPP** connection to send message and get reports

Co-operative Society Software

18 Months

- Built cooperative society management system using CodeIgniter and MySQL with stored procedures, triggers and events.

<https://www.linkedin.com/in/rintu-dutta-43b446166/>

- Implemented member management, loans (various interest calculations), fund management, vouchers, and comprehensive financial reports.
- Delivered project to multiple cooperatives with support and year-end processing features.

HRMS & Payroll Software

12 Months

- Developed and implemented HRMS and payroll modules using CodeIgniter, including employee management, salary structuring, attendance tracking, leave management, and payroll processing.
- Delivered automated pay-slip generation and accurate income tax calculations.
- Integrated solutions seamlessly across multiple client platforms, enhancing payroll efficiency and compliance.

Glamdiva Beauty Salon - Service Expert

2 Months

- Developed order, wallet, coupon and refer-and-earn modules using CodeIgniter and MySQL.
- Salon service & appointment booking
- Customer and admin management
- Digital wallet & transaction management
- First Expiry, First Out (FEFO) wallet deduction logic
- Payment and booking workflows
- Responsive web interface

Educational ERP Software

8 Months

- Built educational ERP modules: admission, fee management, attendance, timetable, faculty management, exam and rank generation using custom PHP and MySQL.

Anngan (Real Estate)

6 Months

- Developed a Laravel-based multi-agency real estate platform featuring comprehensive content, location, property, and project management modules
- Implemented advanced templating system to support customizable user interfaces across multiple agencies
- Enabled secure agency login functionality with subscription-based property listing management to ensure controlled access and usage
- Enhanced platform scalability and user experience through seamless multi-agency support and modular architecture

Betus (Betting Site)

6 Months

- Developed core features for a betting platform using Laravel, including match setup, game management, coin deposit and withdrawal functionalities, and account management modules.
- Integrated Pusher API to deliver real-time updates, boosting user interaction and engagement.
- Implemented comprehensive wallet management system to track and manage user funds efficiently.
- Designed and published betting questions and results, and automated crediting of winning amounts to user accounts.

Vaasist CRM

12 Months

- Worked on Laravel-based CRM handling lead management, uploads, plan purchases and renewals; managed large datasets **4,000,000+ records**.

WBMDFC Finance Term Loan Project

6 Months

- Implemented loan application and sanction workflows using Laravel and PostgreSQL with multi-user roles, EMI generation and extensive reporting modules.

CMS Management Platform

10 Days

Built and delivered a CMS management platform used to successfully create websites across 20+ industries, with flexible content and website management capabilities.

SaaS Event Management System

1 Months

- Developed a multi-tenant event management SaaS platform enabling multiple companies to register and operate with isolated databases.
- Implemented features for companies to independently manage organizations and events within the platform.
- Designed guest list upload and QR code-based attendee verification for secure event entry.
- Integrated ticket booking system with seat number allocation for streamlined event seating management.

SaaS SEO Report Management

13 Days

- Developed a SaaS-based SEO reporting platform to automate and streamline SEO report generation.
- Integrated Google Analytics, Google Business Profile (GBP),

and Facebook APIs to fetch and analyze performance data efficiently.

- Leveraged Laravel, PHP, and MySQL to build a scalable and robust backend infrastructure.
- Enhanced data visualization and reporting accuracy by consolidating multiple data sources into a unified dashboard.

Social & Live-Streaming Platform

9 Months

- Developed an 18+ social and content platform featuring image posts, polls, quizzes, live streaming, and real-time Socket.IO chat.
- Implemented subscription management and wallet transaction flows to support seamless user payments.
- Engineered the platform architecture to efficiently handle large-scale transaction datasets and ensure high performance.

Custom Club Ireland - Custom Clothing / E-commerce Platform

1 Days

Developed and maintained a custom e-commerce platform for personalized clothing and products. Worked on product customization, order management, customer accounts, payments, admin management, and responsive UI. Integrated backend APIs and database-driven business logic for a scalable shopping experience.
